

Online Appendix: Substitution and Stigma: Evidence on Religious Markets from the Catholic Sex-Abuse Scandal

DANIEL M. HUNGERMAN

This online appendix presents regression results referred to, but not shown, in the text.

The first 3 columns of Table 3

	Per Capita Allegations:			Census-Division Allegations			Probit		
	On Catholic Dummy	On Not-Catholic Dummy	On No Religion Dummy	On Catholic Dummy	On Not-Catholic Dummy	On No Religion Dummy	On Catholic Dummy	On Not-Catholic Dummy	On No Religion Dummy
Allegations	-0.00293 [0.00160]	-0.00004 [0.00226]	0.00297 [0.00215]	-0.00037 [0.00022]	-0.00014 [0.00016]	0.00051 [0.00028]	-0.00041 [0.00016]	-0.00003 [0.00012]	0.00054 [0.00025]

The first three columns redo the first three columns of Table 3, using per capita allegations instead of total allegations. Columns 4-6 redo the first 3 columns of Table 3 using allegations in the census region, rather than the state. The last three columns redo the first three columns of Table 3 using Probit regressions rather than OLS (the coefficients are marginal effects). These coefficients are unadjusted (ie, they are not adjusted by a factor of 10).

Columns 4 through 6 of Table 3

	Per Capita Allegations:		
	On Catholic Dummy	On Not-Catholic Dummy	On No Religion Dummy
Allegations	-0.00061 [0.00015]	-0.00004 [0.00013]	0.00065 [0.00017]
Future Allegations (2-Year Lead)	-0.00005 [0.00017]	-0.00019 [0.00017]	0.00024 [0.00015]

These three columns redo columns 4-6 of Table 3, using only the 2-year-lead allegation coefficient. Coefficients are unadjusted (ie, they are not adjusted by a factor of 10).

Table 6

	Donations: Dropping Imputations	Per Capita Allegations: Membership	Per Capita Allegations: Donations	With 2001/02: Membership	With 2001/02: Donations	Allegations from prior year: Membership	Allegations from prior year: Donations	Current Weights: Membership	Current Weights: Donations
Allegations	0.00257 [0.00097]	0.00272 [0.00188]	0.00289 [0.00823]	0.00040 [0.00022]	0.00229 [0.00081]	0.00038 [0.00027]	0.00141 [0.00068]	0.00031 [0.00023]	0.00238 [0.00094]

Column 1 redoes column 2 of table 6 dropping imputed donations data. Columns 2 and 3 redo columns 1 and 2 of Table 6 using per-capita allegations instead of total allegations. Columns 4 and 5 redo columns 1 and 2 of Table 6 adding back in data from the year 2001/02. Columns 6 and 7 redo the columns 1 and 2 in Table 6 using allegations from the prior year, instead of the current year. The last two columns redo columns 1 and 2 in Table 6 weighting by current membership (rather than 1990 membership). Coefficients are unadjusted (ie, they are not adjusted by a factor of 10).

Columns 3 and 4 of Table 6

	On Membership	On Donations
Allegations	0.00070 [0.00029]	0.00143 [0.00069]
Future Allegations (2-Year Lead)	-0.00060 [0.00023]	0.00018 [0.00030]

These two regressions redo columns 3 and 4 of Table 6, using only a 2-year lead for allegations. Coefficients are unadjusted (ie, they are not adjusted by a factor of 10).
