The Journal of Economic Education

The Journal of Economic Education (4 issues per year) offers original articles on teaching economics. In its pages, leading scholars evaluate innovations in teaching techniques, materials, and programs. Instructors of introductory through graduate level economics will find the journal an indispensable resource for content and pedagogy in a variety of media. The Journal of Economic Education is organized around five themes, supporting the many ways in which the scholarship of teaching and learning is conducted in economics.

Research in economic education
Original theoretical and empirical studies dealing with the analysis and evaluation of teaching methods, learning attitudes and interests, materials, or processes.

Economic content
Substantive issues, new ideas, and research findings in economics that may influence or can be used in the teaching of economics.

Economic instruction
Innovations in pedagogy, hardware, materials, and methods for treating traditional and newer subjects. Issues involving the way economics is taught are emphasized.

Online
The Online section identifies exemplary material for teaching and learning economics that is interactive or otherwise not conducive to traditional printed-page format. It features noncommercial work by economists and educators who are creating teaching materials using innovative electronic technology.

Features and information
Reports on the status and events that influence academic economists (the labor market, status of women and minorities, and developments within graduate and undergraduate programs).

Call for Nominations

AEA Distinguished Economic Education Award

The AEA Distinguished Education Award acknowledges excellence in economic education at a national level. Recipients demonstrate a sustained and impactful contribution to several areas of economic education. These areas include teaching, the development of curriculum and pedagogy, scholarship of teaching and learning (SoTL) of economics, mentoring of students and young faculty, and service at the institution, regional, and state levels.

The nomination portal is open and all nominations must be submitted by October 1. To nominate an outstanding economic educator, please submit:

- Nomination letter
- Nominee’s vita
- 3-5 letters of support

Previous winners include Charlie Holt, University of Virginia, and Mark Maier, Glendale Community College. The 2025 recipient of the AEA Distinguished Economic Education Award will be announced at the Friends of Economic Education Reception at the January 2025 ASSA meetings in San Francisco, CA.

For more information about the AEA Distinguished Economic Education Award, the selection process, and to submit a nomination, go to https://www.aeaweb.org/go/aeacee-award.
Overview
This workshop provides opportunities for instructors of undergraduate courses to take part in course design activities and experience pedagogical strategies that will engage all of the students they teach. Attendees will have opportunities to identify learning objectives that focus on the students’ ability to “do economics” and to participate in pedagogical practices that enable students to be active participants in economic analysis.

All accepted applicants are expected to fully engage with each of the three phases of the overall program including constructing learning objectives, studying pedagogical practices that are collaborative and inclusive including cooperative learning, engaging lectures, data integration, and classroom experiments, and integrating lessons learned into their own courses.

Participants will engage with issues of diversity and inclusion throughout the workshop including opportunities to think critically about course goals and learning outcomes, their relationship to pedagogical choices and assessment, and how such decisions might have disparate effects on those of different races, genders, and ethnicities. In addition, attendees will learn how to discuss the sensitive topics that are an important part of the economics classroom.

Eligibility
Applicants must be scheduled to teach during the following fall and spring semesters. Preference will be given to those less than 6 years since PhD. To meet the goals of increasing diversity in the profession, the cohort will be chosen to represent a diverse set of institutions and instructors.

Cost
Accepted applicants must make an electronic payment of $100 to confirm their spot in the workshop. Housing (2 nights) and meals during the workshop will be covered by the AEA under the condition that the accepted applicant attends ALL workshop related activities.

The application portal opens in January 2025 with a rolling acceptance procedure that continues until all workshop slots are filled. Workshop details and the application portal are available at https://www.aeaweb.org/go/educate-workshop.
