

Utrecht, 14th January 2014

**Disclosure statement American Economic Journal
Microeconomics**

To whom it may concern.

The research on my paper *Beneficial long communication in the multi-player electronic mail game* was made possible by funding of the Tjalling C. Koopmans research institute of the Utrecht University School of Economics. This funding is part of my employment contract. There are no other interested parties than this research institute and myself. I do not have any position in any organization that could have stakes in this research.
