Disclosure Statement for "Quasi-Experimental Evidence on the Connection Between Property Taxes and Residential Capital Investment"

Byron Lutz

The early stages of the research were funded by the National Science Foundation through a graduate research fellowship. I received data used in the paper from Christian Hilber and Chris Mayer (land use data) and Richard England (zoning data). I am a co-author on an ongoing project which received funding from the Lincoln Institute of Land Policy (all of the funding was distributed to my co-author as I am not permitted to accept outside funding for research as an employee of the Federal Reserve).
