

## Disclosure Statement

Hunt Allcott

The Short-Run and Long-Run Effects of Behavioral Interventions: Evidence from Energy Conservation

September 2013

Hunt Allcott declares that he has no relevant or material financial interests that relate to the research described in this paper. Opower provided the data analyzed in this paper to the authors under a non-disclosure agreement. The authors and Opower structured the agreement in a way that maintains the authors' independence. In particular, the agreement stipulates that Opower has the right to review the publication prior to public release solely for factual accuracy.

### Background Information

Allcott and Rogers have a non-disclosure agreement with Opower for the use of the data in this paper.

The NDA has a section on rights to publication. The entire section reads:

"Recipient [Allcott/Rogers] may prepare an analysis, summary, article, or other publication or work (a "Publication") that incorporates, uses, or is otherwise derived from Confidential Information. In such case, Recipient shall provide Opower with a copy of such Publication promptly after its completion. Opower shall be entitled to review and comment on such Publication prior to public release solely for factual accuracy and Recipient shall revise the Publication to reflect Opower's reasonable factual comments. Further, Recipient agrees that, in any such Publication, Recipient shall not (i) name or otherwise identify the utility applicable to any Confidential Information or (ii) present any Confidential Information in any non-aggregated form."
